

Quinton Pang Yi Xuan

Kuala Lumpur • 019-390-3300 • quinton.qpyx@gmail.com

Key Skills

Frontend: React +Next.js with Typescript, Angular, VueJS, MudBlazor

Backend: Spring Boot,Node.js + Express.js, Django, Flask, Lavarel, .NET

Database: MySQL, MongoDB, OracleSQL

Image Processing: OpenCV

Mobile Development: React Native, Flutter, Kotlin

Blockchain & Web3: Solidity, Truffle, Ganache, Metamask

Cloud Computing: AWS, Cloudflare

Programming Languages: JS, Java, Python, C++, C#, PHP, Dart, Assembly Language

Machine & Deep Learning: Scikit-Learn, XGBoost, Pandas, NumPy, Tensorflow

AI Tools: Claude Code

Education

Tunku Abdul Rahman University of Management and Technology

Bachelor of Software Engineering (Honours)

CGPA: 3.8901 (First Class Honours)

Kuala Lumpur
June 2023 - June 2026

Tunku Abdul Rahman University of Management and Technology

Foundation in Computing

CGPA: 4.0

Kuala Lumpur
June 2022 - June 2023

- Campus Wide Representative 2023 Under Student Representative Council

Experience

Junior Software Engineer (Intern)

iFAST Global Hub AI Sdn. Bhd.

- Maintained the UK iFast Global Bank Compliance Module using Spring Boot and AngularJS; enhanced monitoring and screening (CIFAS, onboarding, overnight) for \$10,000+\$ daily transactions to meet UK regulations.
- Built seamless integrations between back-office systems and Digital Personal/Transaction Banking flows using Spring Boot APIs and AngularJS, ensuring secure handling of suspicious transactions.
- Leveraged AngularJS and Spring Boot to upgrade core features of the iFAST HQ Intranet System, including the Timesheet (reducing payroll processing time by 20% via automated validation), Leave, Incident Report, and Staff Record modules.
- Translated complex user requirements into scalable mobile app designs using Flutter technology and robust enterprise system architectures.
- Reference: hr.isc@ifastfinancial.com

Kuala Lumpur
November 2025 - April
2026

Junior Software Engineer (Intern)

33 Digitec

- Participated actively in the development of full-stack systems using React.js, Node.js, Sequelize, and Next.js, resulting in a 40% reduction in manual processing time and a 98% uptime post-deployment.
- Collaborated with cross-functional teams including UI/UX designers and backend developers to integrate responsive frontends with RESTful APIs, improving development velocity and feature rollout consistency.
- Implemented performance optimisation strategies using Redis caching, TypeScript static typing, and code-splitting in Next.js, leading to a 50% reduction in initial page load time.
- Managed end-to-end feature delivery across mobile (React Native) and web

Petaling Jaya, Selangor
Apr 2022 - October 2025

platforms, ensuring timely releases, code maintainability, and adherence to accessibility standards.

- Deployed and maintained applications on Cloudflare servers while ensuring minimal downtime.
- Reference: 016-626-0792 (Mr. Chia Wen Qi, Technical Lead)

Projects

UK iFAST Global Bank System (SpringBoot + AngularJS)

February 2026

- Involved in the development of AMLTrac, a transaction monitoring system to detect suspicious transactions.
- Involved in the enhancement of CIFAS, overboarding and overnight screening for VIBAN accounts.
- Maintained and enhanced transaction monitoring module of back-office system to ensure its robustness in detecting suspicious activities.
- Leveraged Oracle Materialized Views to provide the back-office team with near real-time data visualizations of user activities and login history without impacting the performance of the core banking engine.

Go-Lender System (NodeJS + ReactJS)

March 2025

- Developed a web-based and mobile-based Loan and General Ledger application
- Enabled users to manage loan disbursements, repayments, interest calculations, and amortisation schedules.
- Integrated general ledger functionality to automatically record loan or expenses related transactions (debit/credit entries).
- Implemented role-based access control for admins, finance staff, and auditors.

Sales & Demand Prediction System (Final Year Project, Flask + ReactJS)

October 2025

- Utilised powerful Python libraries (such as Pandas and NumPy) to clean, aggregate, and transform massive volumes of raw POS transactional data into structured time-series datasets.
- Leveraged specialised Python libraries (such as Statsmodels for ARIMA/SARIMAX or Scikit-learn) to analyze historical sales trends, seasonality, and promotional impacts to generate future demand forecasts.
- Engineered a high-performance Flask backend to expose secure RESTful endpoints, serving predictive insights, confidence scores, and recommended order quantities as clean JSON payloads.
- Integrated modern charting libraries (Chart.js) to translate complex Python prediction arrays into intuitive, interactive visual timelines mapping historical sales against projected future demand curves.

Achievements & Certifications

- | | |
|--|-----------------------|
| • Intro to Deep Learning by Kaggle | May 2026 |
| • Pandas Certification by Kaggle | May 2026 |
| • Intermediate Machine Learning Certification by Kaggle | May 2026 |
| • Spring Boot for Beginners Certification by AmigoCode | June 2025 |
| • F&B Reservation System Competition by QSolve — 2nd Runner Up | April 2025 |
| • Malaysian University English Test — Band 5.0 | March 2025 |
| • 3 x President's List Award, 2 x Dean's List Award by Tunku Abdul Rahman University of Management and Technology | June 2023 - June 2026 |
| • Soft Skill Certification by Tunku Abdul Rahman University of Management and Technology — Gold Tier | June 2024 |
| • Codenecton Competitive Programming Competition (Open Category) by | November 2022 |

Multimedia University — Finalist

• **JomCoding Competition by KPM and MDEC** — 1st Runner Up

September 2020

Additional

Language Skills: English (MUET Band 5.0), Chinese, Malay, Cantonese, German (Beginner Level)
